Reciprocal Relationships: how can partnerships help us and our collections develop?

Call for Abstracts & Save the Date

- Day 1: Evening ice breaker in Museum, to include some collections tours
- Day 2: Winter seminar with workshops, AGM, and conference dinner
- Day 3: Field trip

The Winter Seminar will focus on building and maintaining relationships between individuals, institutions and networks. By working together and sharing knowledge, we benefit from collective experience. **But what works and what doesn't? How should this knowledge be disseminated?** We are looking for presentations that encompass the following themes, from anyone who works, volunteers or has an interest in geological collections:

- Citizen Science
- Cross-department endeavours
- Collecting networks/local groups
- Community outreach
- Multi-museum partnerships
- Research collaborations
- Subject Specialist Networks (SSNs)
- Volunteer projects

Please send abstracts of up to 250 words to events@geocurator.org and state whether it is for a poster or platform presentation. Presenters will be invited to submit papers to the *Geological Curator*. **Abstract deadline is 14th October 2024**
